Frontend Engineer

SUMMARY

A Frontend Engineer and Computer Science student at Adeleke University with hands-on experience building production React applications. Specialized in translating Figma designs into fast, accessible, and visually intentional web experiences. Currently interning at Yaba College of Technology while building EcoSpend — a full-stack fintech app with receipt scanning and carbon tracking. Available for freelance and full-time frontend roles.

EXPERIENCE

Webometrics Intern May 2026 – Present Yaba College of Technology · Lagos, Nigeria

- Support web presence and digital visibility initiatives for the institution
- Apply frontend skills to improve institutional web performance and ranking metrics •
- Collaborate on content strategy and web optimization to improve Webometrics ranking

PROJECTS

EcoSpend — Fintech Carbon Tracker 2026 – Present React · Vite · Tailwind CSS v4 · React

Router · Claude API

- Built complete frontend for SDG 12-aligned app — auth flow, receipt scanning pipeline, and analytics dashboard
- Integrated Claude API for AI-powered receipt reading, category suggestion, and eco insight generation
- Implemented centralized API layer using Vite environment variables and React Router location.state for data flow
- Deployed frontend demo to Vercel as portfolio piece while backend integration is finalized

Developer Portfolio Site 2026 React · Vite · React Router · CSS-in-JS

- Designed and built a multi-page portfolio site with animated tech stack marquee and project showcases
- Converted Figma designs to production React components with pixel-accurate styling •
- Implemented infinite scroll marquee using requestAnimationFrame for smooth, jank-free animation

EMERGE — Editorial CMS ²⁰²⁶ Flask · SQLite · JWT · Python · HTML/CSS

- AI assisted full-stack CMS role-based invite code system (Admin, Editor, Author, Visitor)
- Implemented JWT authentication, session management, and protected routes from scratch
- Designed and built responsive frontend with custom CSS and Jinja2 templating

EDUCATION

BSc Computer Science ^{2024 – Present} Adeleke University · Ede, Osun State, Nigeria

- Relevant coursework: Systems Analysis & Design, OOP (Java), Database Design, Web Development
- Building production applications alongside coursework — EcoSpend (fintech) and EMERGE (CMS)

SKILLS
